company can sell out if it chooses, but this is the first I have heard about an English syndicate in the matter.

"As for the Cataract General Electric Company, it has secured certain rights from the Niagara Falls Power Company, a wholly distinct organization. There is not one stockholder in common between them, unless it be Frank W. Hawley, the vice-president of the Cataract Company, Our contract with the State cost us from \$15.690 to \$25.990 in the money we expended in 1853 in experimenting. That contract was drawn up, every word of it, by Governor Flower. He put in the strongest kind of restrictions, limits upon our charges and other things calculated to frighten us out, I should say. I was opposed to going into the company after seeing those restrictions, but I finally went in."

The rumor referred to has it that the Vanderbilts and representatives of the Erie Ruilroad fought the granting of the franchise to the company, and that they were behind the restrictions. On this point Mr. Vedder said: "I know nothing about that. I do know that Governor Flower made the restrictions as severe as he well could. We then made a contract with the Eric Canal Traction Company for the use of our electricity in the same way that we, on the other hand, secured rights from the Niagara Falls Power Company for the use of the electricity generated by it from the power of the fall. There is no reason why the present stockholders of the Eric Canal Traction Company should not sell out for \$2,000,000 if they can."
